

AKASH RUPAPARA

+1-669-268-9419 | akash.rupapara@gmail.com | [LinkedIn](#) | [GitHub](#)

Technical Skills

Languages	: C++, Go, Java, TypeScript, Python
Backend / Systems	: Distributed Systems, Microservices, gRPC, REST APIs, Event-Driven Architecture
Frontend	: React.js, Redux, TypeScript, Performance Optimization
AI / GenAI	: LLM Integrations, Prompt Engineering, Agentic Workflows, AI-assisted Systems
Cloud / Infra	: AWS, Kubernetes, Docker, Terraform, CI/CD, GitHub Actions
Data / Streaming	: Kafka, Redis, Snowflake
Observability	: Grafana, Honeycomb, Distributed Tracing, Metrics
Databases	: PostgreSQL, MySQL, MongoDB

Experience

Fortinet Inc.	Sep 2024 – Present
Senior Software Engineer	Sunnyvale, CA
- Designed and built CNAPP backend systems for threat detection and investigation, processing 10M+ events/day and enabling scalable triage of multi-cloud alerts across 100+ enterprise customers. - Built GenAI/LLM-assisted backend workflows for alert summarization and contextual enrichment, reducing analyst investigation effort by 40% and improving threat signal prioritization. - Designed and scaled gRPC microservices supporting 5K+ concurrent requests; optimized query performance improving latency by 25% for high-cardinality security datasets. - Built end-to-end threat alert features across React/TypeScript frontend and Java/Go backend APIs, delivering actionable insights for cloud entity compromise detection across 1,500+ enterprise customers. - Developed a low-latency alert pipeline and Python-based throttling service, reducing false positive spikes by thousands/day; drove optimizations cutting dashboard load times by 35%. - Enhanced observability through metrics, tracing, and structured logging, reducing MTTR by 35%; established agentic AI-assisted dev workflows improving team engineering efficiency. - Shipped 6+ major features with product, design, and security research teams; promoted in the first eligible cycle for delivering high-impact work ahead of schedule. - Promoted in the first eligible promotion cycle, recognizing technical impact, cross-team collaboration, and system ownership.	
Lacework Inc.	Jan 2023 – Aug 2024
Senior Software Engineer	Mountain View, CA (Remote)
- Provided on-call support to 1,500+ customers (~\$100M ARR); owned alert details UI and API delivering contextual security investigation data, reducing MTTI by 65%. - Built a Python alert throttling service reducing false positive spikes by thousands/day; led Codefresh → GitHub Actions migration achieving 3x faster build times. - Core contributor to Lacework's CNAPP alerting platform (Sutter Hill & Google Ventures backed); built a low-latency threat intelligence pipeline cutting processing time from 90–120 min to under 5 min (P95). - Integrated MITRE ATT&CK framework tags into the alert UI driving a 30% increase in user interaction; optimized DB queries and UI rendering with high test coverage via Jest, JUnit, and Cypress.	
Meta (Facebook)	May 2022 – Aug 2022
Software Engineering Intern	Seattle, WA
- Built full-stack features for Fantasy Games (Facebook App, 80M+ users); drove a 25% increase in UI interaction and 30% performance improvement via pagination and query optimization. - Refactored core functions and database queries improving performance by 7%; met all stretch goals ahead of schedule earning an Exceeds Expectations rating.	
SS8 Networks Inc.	Jan 2022 – May 2022
Software Engineering Intern	Milpitas, CA
Designed and maintained distributed React applications and microservices; delivered UX redesigns fulfilling requests from 75% of the customer base.	
Shriji Technoaspire Pvt Ltd	May 2019 – Dec 2020
Software Engineer	Gandhinagar, India
Built a production smart electric meter web app enabling 20% electricity savings; achieved 90% rendering improvement via Redux optimizations; built a coding platform used by 1,000+ students.	

Projects

Indeed-Clone MERN, Kafka, Redis, Docker, AWS
Microservices-based job platform for 10K+ users; improved performance by 12% via Redis caching and Kafka async messaging with fault-tolerant architecture.
Vaccine Management System ReactJS, Spring Boot, MySQL, AWS
Full-stack system used by 20K+ users for appointment scheduling, inventory tracking, and reporting; built collaboratively with a 4-member team.

Publications

Advanced Assistance Services Using Hybrid Ambulance (AASHA) System IEEE, Feb 2020
Published in IEEE; proposed a hybrid ambulance system reducing post-accident EMS response time by 3 minutes with a 97% survival rate improvement over traditional systems.

Awards & Honors

100% Tuition Fee Scholarship Government of Gujarat, Ahmedabad University	Aug 2016
Awarded full undergraduate scholarship based on academic merit for Bachelor of Technology program.	

Education

Master of Science in Software Engineering	Jan 2021 – Dec 2022
San Jose State University	San Jose, CA
Bachelor of Technology in Information and Communication Technology	Aug 2016 – May 2020
Ahmedabad University	India
